

My favorite female

Have you seen her favorite brain
It's organic with an image of a world
being drawn inside of it in every single moment
Hello world, she is thinking of you

She really doesn't have to work for money
so she's working in a digital network
She's a real nowhere girl living in a nowhere world
making nowhere plans for nobody

My favorite female makes me feel like I'm a king
When I'm with her I can almost play guitar and sing
No need for computers, just put me in a world
I will face reality with my favorite girl

Have you seen my favorite waste of time
Let her go, let her go
I took a trip to the edge of this world
and I was thinking of you

Honey, would I lie to you, this is not a place
for a nowhere girl to be
The good guys are hiding in the shadows
Oh baby, it's a wild, wild, wild, wild world

My favorite female makes me feel like I'm a king
When I'm with her I can almost play guitar and sing
No need for computers, just put me in a world
I will perform with my girl for a viewer beyond worlds
